(57) **CLAIM**

We claim the ornamental design for a banknote, identification card, passport, check, security document, government

stamp, vehicle registration, or package, with security feature, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the security feature shown removed from the banknote, identification card, passport, check, security document, government stamp vehicle registration, or package, with security feature showing our new design as viewed from a first angle;

FIG. 2 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 3 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 4 is a front view of a banknote with security feature showing our new design as viewed from a first angle;

FIG. 5 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 6 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 7 is a front view of an identification card with security feature showing our new design as viewed from a first angle;

FIG. 8 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 9 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 10 is a front view of a passport with security feature showing our new design as viewed from a first angle;

FIG. 11 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 12 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 13 is a front view of a government stamp with security feature showing our new design as viewed from a first angle;

FIG. 14 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 15 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 16 is a front view of a vehicle registration with security feature showing our new design as viewed from a first angle;

(Continued)

FIG. 17 is a front view thereof, as viewed from a second angle that is different from the first angle;

FIG. 18 is a front view thereof, as viewed from a third angle that is different from the first and second angles;

FIG. 19 is a front view of a package with security feature showing our new design as viewed from a first angle;

FIG. 20 is a front view thereof, as viewed from a second angle that is different from the first angle; and,

FIG. 21 is a front view thereof, as viewed from a third angle that is different from the first and second angles.

The appearance of the transitional image transitions between the images shown in FIGS. 1-3, 4-6, 7-9, 10-12, 13-15, 16-18, and 19-21, respectively. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines in the figures illustrate portions of the security feature and environment that forms no part of the claimed design.
